

gobuster

Basic usage

```
gobuster dir -u http://TARGET_IP:PORT -w /usr/share/wordlists/seclists/Discovery/Web-Content/big.txt
```

Enumerating with extensions (filter the extension based on target)

```
gobuster dir -u http://TARGET_IP:PORT -w /usr/share/wordlists/dirbuster/directory-list-2.3-small.txt -x php,txt,py,html,aspx
```

Enumerating vhosts (after updating `/etc/hosts`)

```
gobuster vhost -u <http://hostname.domain> -w /usr/share/wordlists/seclists/Discovery/DNS/subdomains-top1million-110000.txt --ad
```
